USTECH StarchQC

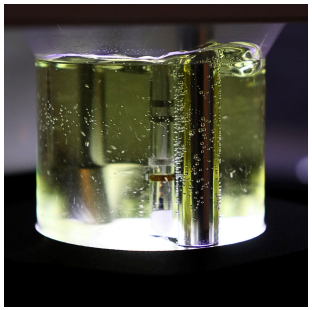

Rapid Results, Standardized Quality.

USTECH StarchQC

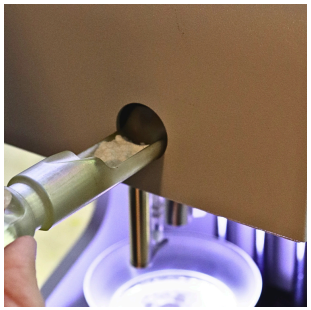

Rapid Results, Standardized Quality.

USTECH StarchQC uses an advanced amperometric method based on iodine absorption to rapidly measure starch damage in flour. In just 8 minutes per 1 g sample, it delivers standardized, reproducible results that strongly correlate with enzyme-based methods. Results are expressed in multiple industry units (AI %, NDS, UCDc, AACC, FARRAND).

Precision Measurement Technology

The advanced amperometric probe monitors the iodine reaction with millisecond precision. By instantly converting electrochemical changes into digital data, it ensures fast, reproducible, and reliable analytical results.

Homogeneous Flow Control

A specially engineered sample spoon ensures the controlled transfer of flour into the testing chamber. Utilizing a counter-clockwise, gently vibrating motion, it prevents sample accumulation and guarantees a smooth, perfectly even mixture into the solution.

Instant & Secure Reporting

The built-in rapid printer generates physical results the exact moment the analysis concludes. Providing permanent and tamper-proof printouts, this feature delivers unalterable, highly reliable, and easily archivable data essential for rigorous quality control processes.

Technical Specifications

Size(LxWxH)	250x175x320 mm
Weight	~7.9 kg
Working Temperature	RT-50 °C
Test Time	8 min
Operator Time	2 min
Sample Weight	1000mg

Industry Applications

Designed to meet the rigorous demands of the modern food industry, the USTECH StarchQC provides actionable data to optimize every stage of your production.

Flour Milling Industry

Enables real-time monitoring of roller mill performance. Millers can instantly adjust grinding pressure to maintain consistent flour quality, prevent over-processing, and optimize energy consumption.

Commercial Bakeries & Baked Goods

Allows bakers to accurately predict water absorption rates and dough stickiness before mass production begins. Guarantees uniform baking quality, structural volume, and crust color across all batches.

Quality Control & Food R&D Labs

Streamlines laboratory workflows with rapid testing protocols. The system automatically calculates and expresses results in universally recognized industry units, including AI %, NDS, UCDC, AACC, and FARRAND, ensuring seamless global standardization.

Our Core Commitments to You

"The Standard in Spectroscopy" is our commitment to your success. We provide cutting-edge analytical solutions so you can focus entirely on optimizing production, streamlining workflows, and ensuring uncompromised product quality.

Innovative

We leverage advanced technological expertise to develop state-of-the-art solutions—like direct measurement systems—that redefine laboratory standards.

Reliable

We guarantee precision and reproducibility, ensuring consistent, lab-grade results you can trust in every analysis.

Effortless

We simplify your daily workflow with intuitively designed instruments requiring zero-to-minimal sample preparation.

Cost-Effective

Maximize economic benefit by completely eliminating the need for expensive consumables, toxic reagents, and time-consuming methods.

Safe & Clean

We prioritize operator safety and the environment through robust housing architectures and chemical-free analytical processes.

Fast

Empowering rapid decisions with instant insights. We deliver accurate results in under a minute to keep your production moving.
